

## Senate Goals

- 1) These are goals that we will commit to forming a subcommittee to track/see through.
- 2) They should probably be minimal in number – 3-5 – so Senators are not overwhelmed with additional work.
- 3) The regular work of the Senate (responding to AS committees, district directives, state mandates, college “fires”, resolution writing, etc.) will continue, these goals should be directed – manageable one-year tasks that will benefit the college/faculty/ functionality as a whole.
- 4) The subcommittees will report out progress on the tasks monthly (more frequently if necessary) to make sure they are getting the proper support for task completion.
- 5) These tasks can coincide with the 2019-20 Presidential Goals, but they not need to if there are other goals the Senate wishes to put their energies towards.
- 6) Once the subcommittees come up with a plan of action, this will be voted on by the Senate, and any actions the President needs to take as a result will be considered “authorized” at that point, and then the President will report out on the progress of the assigned tasks.
