# Filter or Search Banks

The screenshot shows the 'Banks' interface. At the top right is a '+ Bank' button. Below it is a 'Filter By' dropdown menu with a red arrow pointing to it, labeled '2'. The dropdown menu is open, showing options: '1 This Course', '3 Shared with Me', '4 Institution Banks', '5 Shared with Courses', and 'This Course' (highlighted). Below the dropdown is a 'Search Banks' input field labeled '6'. Below the search field is a table of item banks.

By default, the Item Banks page displays the **This Course** filter, which displays item banks shared with the course [1].

To select another bank filter, click the **Filter By** drop-down menu [2]. Then select one of the following filter options:

- **Shared with Me** [3]: all item banks created by or shared with you or the course
- **Institution Banks** [4]: item banks shared by your institution
- **Shared with Courses** [5]: item banks shared with any courses in which you are enrolled

To search for item banks, enter a search term in the **Search Banks** field [6].

# Notes:

- New Quizzes does not include a survey feature. Therefore, surveys migrated from Classic Quizzes come over as standard quizzes in New Quizzes.
- After migration to New Quizzes, multiple dropdown questions display as matching questions.
- Text No Question questions migrate to New Quizzes as Stimulus questions. An instructor must add a question in order for it to display in a quiz.
- Question groups with manually created questions will migrate as item banks in New Quizzes.
- If a quiz is migrated multiple times, Canvas uses smart merging to decipher the question bank content that should be retained. This process helps ensure all content is retained, such as in cases where multiple users may be making edits to a quiz at the same time.
- Practice quizzes from Classic Quizzes can be migrated to New Quizzes. Once migrated, by default, the practice quizzes are displayed as zero points possible and are hidden from the Gradebook and Grades page.
