

INSTRUCTIONAL EQUIPMENT REQUEST

Due in Dean/Unit Head's Office on September 19, 2011 (FALL) and March 1, 2012 (SPRING)

The Definition of Instructional Equipment can be found in the California Community College's Budget and Accounting Manual. A copy of these definitions is on the PBC webpage: http://grapevine/pbc/InstructionalEquipment.php

Name of Requestor: Brian Hagopian

Division/Unit : BCATSS

Brief title of request (equipment or materials being requested must be similar, related or part of a system. Automotive Hand tools - completion of pre

Request amount (unit cost and total cost including tax and shipping. Please include all costs including installation, modification to existing facilities to accomodate new equipment, etc.): This should come from the vendor quote

Table with 2 columns: Item (s) cost, Amount. Rows include Tax (.0875), Shipping, Installation, Facilities Modification, Other, and Total Cost (\$13,918.28).

Attach copy of quote(s), estimate(s) and requisition(s): (Must attach quote & requisition; absence of either will delay processing)

Brief description of specific equipment or materials requested and what they will be used for: (include the # pieces being requested; i.e.: 10 crayola crayons, sky blue, etc. in 250 words or less)

30 each of, screwdriver sets, plier sets, speed handles 3/8 drive, T handle 3/8 drive
5 each of 260 piece tool sets
7 each of OBD II scanners, CAN scanners
18 each of wench sets
12 each of drive tool sets
These tools will complete the sets that were purchased last Spring with the Instructional equipment funds. Thank you.

Is this in your Program Review? Yes [x] No [ ]

Our Program review states that our budget does not allow us to purchase tools. We have never had the money to do it. With continuing reductions in budgets the situation is even worse. Our tools are worn out and most are not usable, this is causing safety concerns. We must have these basic hand tools for the students to complete their lab assignments. The following is quoted from our Program review page 8 paragraph one and three. "Must Haves. There are a few items that must be funded in the automotive budget. First is service information such as Alldata or Mitchell, cost is \$1000 per year. Second is updating of alignment, scanner, and balancer software. This can cost anywhere between \$500 and \$5000 per year. Because it has been ignored for so long it will cost at least \$5000 to "get back in the swing". It has become apparent to faculty, staff and especially student that our equipment if out of date.", "Money has always been a problem. Ten years ago half of our budget was given to welding because they ran out of money. Every year since then we have been operating with a half budget. Every year we are further in the hole and instructors are running out of personal equipment and tools to loan the program."

Is it a replacement? Yes

Upgrade? Yes

New technology? Yes

Please explain?

These are replacements for worn out tools and a completion of kits that were purchased last Spring with Instructional Equipment funds. We waited to ask for these so we could make sure what we are purchasing would be put to use and not just wasted by taking up space.

Following is the evaluation criteria; please see corresponding Instructional Equipment Rubric.

***Instructional and Service Impact***

How will this item have a positive impact on instruction and/or teaching and learning in the classroom? Is this for use by the Instructor or students, or both?

Last year instructional equipment funded some new tools for us. When we put together the request we only quoted items we knew were used and needed every day. The automotive instructors knew we need much more but felt it was best to wait and track tool useage first so we would not over buy and be wasteful. We wanted to see what else the students needed and have tracked this over the last six months. In interest of saving money as much as possible the tools we are requesting now are needed and have been tracked as such.

During the time that we have had the new tools from last Spring available, the instructors have noticed what an effect these tools have on the students. Previously student comments were always negative about the state of tools that LPC had. This negativity was then thought about LPC in general and lowered students sights of their future. Now, with the new tools, students have been excited to work in the lab and gain the hand-on competency they greatly need. Every day we hear how wonderful it is to have the right tools for the job and how nice it is to use tools that have not exceeded their life expectancy. On top of that students have noticed the consistency of the tools, and is not some hodgepodge of worn out junk. It is hard to believe that tools alone could have such an effect on learning, but from the questions and bright eyes of the students we now know the truth.

***Impact on Enrollment***

**Will the equipment impact enrollment, attract or increase the number of students participating in a course or program?**

With these tools we will not be ahead of any other schools, rather we will be on par. The tools we are requesting are nothing special and all technicians in the field must have them and know their use. Without tools our program will not be attractive to students. In addition the tools we have left are so few or broken, some students are not able to complete their lab assignments or must wait extended periods of time.

**Access**

**How does this item promote the principles of universal design, by providing opportunities for under-represented populations & accommodate students with diverse learning styles?**

The tools are not only engraved with sizes, they also carry special markings which make it easier to identify them by feel not just by size.

**Outcomes**

**How will this equipment enable or enhance SLOs? What are the consequences related to learning outcomes if request is not funded?**

With out tools students can not fulfill any of the SLO's in automotive. Our SLO's are based in the lab which is where we are able to measure the understanding of the students. The lab is where the student show what they have learned and if they have grasped the concept. With out these tools they can not perform the job duties and therefore can not be graded by either SLO, instructor or an employer. The following is a SLO for Auto 55. "Did student drain oil into approved container?" To perform this taks the student must have safe and proper hand tools. Next is a SLO from Auto 56 "Did student follow service manual proceedures?" When following manufacturer proceedures a technician must use the proper tools in the correct manner.

**Total Cost of Ownership (This is an attempt to identify what the ongoing costs of purchasing this equipment will be to the institution)**

- a) What is the lifespan of the equipment? 5 years? 10 years? 20 years?
- b) Is there sufficient current/planned space available for the storage and use of this equipment? If so, where will it be housed? If not, is there a proposed location and are there any costs associated with installation or modifications to the space?
- c) Are there operating costs and how will they be covered by the department?
- d) What will be required to maintain the equipment, such as regular servicing or upkeep? Who will perform maintenance, and what will the estimated costs be?

These tools are guaranteed for life. If one is broken an instructor can simply take the tool to Sears and receive a new one, no questions asked. There are no operating costs involved, No up keep, students wipe them down when they have finished their lab assignment.

***Visibility/Profile within Community***

**Is this a "flagship" item that will bring recognition/notoriety to the College or raise the stature of the program? Will it attract students and/or enhance the image of the College in the community because of its rare, one-of-a-kind status?**

No, they are hand tools which are required for the program.

**Commitment to Sustainability**

How does this equipment exceed basic sustainability goals and encourage renewable resources at the College? Is the design/operation of this item in keeping with the College's commitment to sustainable practices?

Does not apply.

**Health, Safety & Security**

Does this equipment address any health, safety & security concerns? If so, please explain below.

Yes, using worn out tools is a safety hazard. The safety test for automotive that is given to students every semester clearly states this.

**Signatures (required)**

(If requesting computer-related equipment/software, LPC IT Department Review is required.)

About Shop Your Way RewardsSM

It's our free program that rewards our best customers. As a Shop Your Way Rewards you earn points when you shop at Sears, Knart, Lands' End, the great indoors, Sears Auto Centers, mygofer Sears Home Services, and Knart Pharmacy. Then you redeem those points online or in store at those same places, except Sears Home Services and Knart Pharmacy. The more you shop, the faster your points and special benefits pile up. It's a simple, fun and exciting way to shop.

Where can I find my Rewards numbers

Enter your Member # below beginning with 7081.

If you've lost or misplaced your card or numbers visit ShopYourWayRewards.com.

It may take up to 7 days after a purchase for points to appear on your account.

Shop Your Way Rewards

Get rewarded for shopping. As a member of shopyourwayrewards, you'll earn Rewards every time you shop. And the more you shop, the faster the benefits add up. It's super easy to use and best of all - free. Items may qualify for bonus rewards which will post onto your account in less than 48 hours. Get all the details on Shop Your Way Rewards.
