

# Instructional Equipment Request (IER) Form FY 2022-2023

## Deadlines

Date	Action
October 12, 2022	IER forms due to Division Dean
October 19, 2022	Division review of IER forms (Dean & VP signature)
October 21, 2022	IER forms due to Executive Assistant of Administrative Services (with Dean & VP signature)

## Checklist

- All IER form fields complete (**attach requisition and quote before e-signing IER form**)
- Requisition completed and attached
- Valid quote attached (with extended expiration date) including (1) shipping costs, (2) installation fees, and (3) taxes. **Do not split quotes or submit duplicate quotes.** For assistance with quotes, please contact Bill Pagano at [bpagano@clpccd.org](mailto:bpagano@clpccd.org) or (925) 485-5271.
  - o If the quote total (including taxes) ranges from **\$30,000 to \$99,099**:
    - You must submit **three** written quotes with your request.
  - o For quotes of **\$99,100 or more**, the request must go out for bid (aka RFP process) and requires Board approval. You will be provided further instruction after your request is approved.
- IER form and requisition signed by Requestor
- IER form, requisition, and quote submitted as one PDF file to Division Dean including:
  - o New Vendor Form (if new vendor)
  - o Copy of W9 (if new vendor)

\*Note: Mac Users – do not use Apple Preview to complete forms – data will not appear when printed.

## IER Process Flow

1. All paperwork filled out and signed by Requestor
2. Requestor submits to Dean for signature
3. Dean submits to VP for signature
4. VP submits to Executive Assistant of Administrative Services for review
5. EA Admin Svcs submits to M&O and IT for review
6. EA Admin Svcs creates scoring spreadsheet and disseminates to committee
7. RAC scores submissions and returns to EA Admin Svcs
8. EA Admin Svcs combines committee scores for review
9. RAC Chair documents committee scoring in memo
10. College President meets with RAC Chair to review committee recommendations
11. President’s Office provides approval memo to RAC
12. RAC submits IER forms to Business Office for processing

## Instructional Equipment Definitions

### Allowable Items

**Allowable Items:** Instructional equipment expenditures are eligible if the equipment, library material, or technology is for classroom instruction, student instruction or demonstration, or in the preparation of learning materials in an instructional program. There are five categories that will be used to classify instructional support. Please note that requests are not limited to the examples shown below.

1. **Equipment and Furniture:** instructional equipment and furniture for primary use by students in instructional programs:
  - a. Classroom/laboratory equipment including whiteboard, screen, projector, etc.
  - b. Instructional furniture including desks, tables, podium, chairs, etc.
2. **Information Technology:** instructional information technology equipment for student use in classrooms and/or laboratories including desktops, laptops, monitors, printers, servers, network/wireless infrastructure, AV/TV, multimedia.
3. **Software:** software licenses are allowed but only the initial year is permitted. Other software that are permitted are those that are used in excess of one year and software modifications that add capacity or efficiency to the software that defers obsolescence and results in an extension of the useful life of the software, including registration, counseling, student services, learning management systems for student use.
4. **Adaptive Equipment:** adaptive equipment for ADA/OCR students are allowed to assist them in a learning environment.
5. **Library Material:** databases, online subscriptions, books, periodicals, videos, etc.

### Non-Allowable Items

**Non-Allowable Items:** Administrative or non-instructional purposes including equipment being used for administrative or non-instructional purposes is not allowed, including photocopiers, file cabinets, bookcases, computers, networking infrastructure, software licenses.

## IE Rubric

RAC evaluates each IE request based on the rubric below. RAC stresses the importance of quality requests. RAC may choose not to rank incomplete IE requests.

Criteria	Strong Evidence	Adequate Evidence	Limited Evidence
<b>LPC Mission &amp; Planning Priorities</b> [Section 2] <i>(5 points)</i> Ranking Scale	Clear and compelling evidence/data that equipment will fully support LPC Mission and Planning Priorities. 4-5	Clear evidence/data that equipment will fully support LPC Mission and Planning Priorities. 2-3	Limited or no evidence/data that equipment will support LPC Mission and Planning Priorities. 0-1
<b>Educational Items: Programmatic Impact and Institutional Support</b> [Section 3] <i>(10 points)</i> Ranking Scale	Clear and compelling evidence/data (as stated in program review) that this equipment will have substantial impact on program curriculum. 8-10	Clear evidence/data (as stated in program review) that this equipment will have substantial impact on program curriculum. 4-7	Limited or no evidence/data (as stated in program review) that this equipment will have an impact on program curriculum. 0-3
<b>Teaching &amp; Learning</b> [Section 4] <i>(10 points)</i> Ranking Scale	Clear and compelling evidence/data that equipment provides much needed or beneficial enhancement to instruction. 8-10	Clear evidence/data that equipment provides enhanced instruction that is not met through current means. 4-7	Limited or no evidence/data that equipment provides enhanced instruction that is not met through current means. 0-3
<b>Outcomes</b> [Section 5] <i>(5 points)</i> Ranking Scale	Clear and compelling evidence/data that equipment will support course and/or program outcomes above and beyond current capability. 4-5	Clear evidence/data that equipment will support course and/or program outcomes beyond current capability. 2-3	Limited or no evidence/data that equipment will support course and/or program outcomes beyond current capability. 0-1

# Instructional Equipment Request Form

Name of Requestor: Amelia Blackshear

Division: PATH

This Equipment Request is:  A Replacement |  An Upgrade |  New Equipment or Technology

## SECTION 1: Equipment Description

Describe the specific equipment requested and how it will be used to replace, upgrade, or provide new technology to LPC from what is currently in place:

### Equipment Location

Building #: Public Safety Complex (FALL 2023)

Room #: TBD

### Comments:

The Emergency Medical Services (EMS) Department requests medical instructional equipment, the Laerdal Q-CPR Manikin, to replace current outdated and malfunctioning medical equipment to provide upgraded technology based on regulatory guidelines determined through the principles of evidence-based medicine (EBM). EBM provides a framework for clinicians to determine whether interventions are effective and suitable for use in their training and practices. EBM has ultimately led to the implementation of additional processes for prehospital healthcare training and for students to assess, monitor, and treat patients with integrated research evidence. These have guided the development and evolution and utilization of EMS technologies that were not previously possible in EMS field care.

The Laerdal Q-CPR Manikin is the standard in emergency care for practitioners and patient care teams who require the most clinically innovative and effective cardiopulmonary resuscitation (CPR) training device available today. The Laerdal Q-CPR Manikin has adaptive feedback signals, mandated by the American Heart Association (AHA), for the student so that he or she recognizes if they are delivering chest compressions either too deep or too slow, and/or at the proper rate. Providing effective depth and rate of chest compressions is crucial for patient survival. As with other parts of the healthcare system, Emergency Medical Services (EMS) leaders, medical directors, educators, and clinicians strive to deliver high-quality, and safe CPR care consistent with best practice.

### If applicable, describe the legal requirement, mandate, or safety concern related to the purchase of this equipment, making specific reference to legal requirements or regulations:

The LPC EMS Department must comply with several oversight and regulatory agencies to provide pre-hospital career technical education (CTE) training courses and programs. The Paramedic education program curriculum is promulgated and governed by these entities. The following organizations prescribe the mandates and legal requirements for LPC's Emergency Medical Services (EMS) training programs and courses wherein exists the basis of the purchase of the requested instructional medical equipment. The United States Department of Transportation (DOT), National Highway Traffic Safety Administration (NHTSA) established the National Standard Curriculum for Emergency Medical Technician-Paramedic (EMT-P, Paramedic). This curriculum represents the minimum required information to be presented within a course leading to certification as a Paramedic.

LPC's Paramedic Academy is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP), the leader and largest postsecondary programmatic accrediting agency of the health sciences professions education. CAAHEP is recognized by the Council for Higher Education Accreditation (CHEA). At the heart of the CAAHEP accreditation system are the nationally-recognized Standards and Guidelines. CAAHEP Standards have common elements with discipline-specific requirements for training entry level practitioners in the paramedic profession. The Standards review process is rigorous, including input from the communities of interest, a public open hearing, and approval by the Committee on Accreditation (CoA).

\*The program must demonstrate by comparison that the curriculum offered meets or exceeds the content and competency of the latest edition of the National EMS Education Standards.\*

Specifically, CAAHEP carries out its accrediting activities with EMS programs in cooperation with the Committee on Accreditation of Educational Programs for the Emergency Medical Services Professions (CoAEMSP). LPC's programmatic accreditation in the EMS disciplines serves a very important public interest and reflects what a student needs to know and be able to do to function successfully within prehospital care profession. Additionally, LPC's EMS programs require compliance meet the regulations of the National EMS Scope of Practice Model (Practice Model). The Practice Model is a work product commissioned by the NHTSA as a continuation of the commitment of the National Highway Traffic Safety Administration (NHTSA) and the Health Resources and Services Administration (HRSA) to the implementation of the EMS Agenda for the Future ("EMS Agenda"). It is part of an integrated, interdependent system, first proposed in the EMS Education Agenda for the Future: A Systems Approach ("Education Agenda") that endeavors to maximize efficiency, consistency of instructional quality, and student competence. It supports a system of EMS personnel licensure that is common in other allied health professions and is a guide for States in developing their Scope of Practice legislation, rules, and regulation.

The Emergency Medical Services System and Prehospital Emergency Medical Care Personnel Act (California Health and Safety Code sections 1797 et seq.) created the Emergency Medical Services Authority in 1980.

The EMS Authority is charged with providing leadership in developing and implementing Emergency Medical Services (EMS) systems throughout California. In California, day-to-day EMS system management is a local responsibility. Each county developing an EMS system must designate a local EMS agency (LEMSA) which can be the county health department, an agency established and operated by the county, an entity with which the county contracts for the purposes of EMS administration.

The state's California Code of Regulations, Title 22, Division 9, Chapter 4, Emergency Medical Technician-Paramedic, Article 3, Program Requirements for Paramedic Training Programs contains EMS program requirements and education. The California Code of Regulations (CCR, Cal. Code Regs.) is the codification of the general and permanent rules and regulations (sometimes called administrative law) announced in the California Regulatory Notice Register by California state agencies under authority from primary legislation in the California Codes.

Locally, the Alameda County Emergency Medical Services Agency (ALCO EMS) is the Agency that plans, implements, and oversees all Emergency Medical Services (EMS) activities conducted in Alameda County. ALCO EMS maintains the highest standards for EMS educational programs in accordance with California State Regulations. ALCO EMS provides approval and oversight for EMS training programs operating in Alameda County. The Alameda County EMS Agency is the approving authority for any organization wishing to conduct a Paramedic Training Program within Alameda County.

## SECTION 2: LPC Mission Statement and LPC Planning Priorities

### LPC Mission Statement

Las Positas College is an inclusive, learning-centered, equity-focused environment that offers educational opportunities and support for completion of students' transfer, degree, and career- technical goals while promoting lifelong learning.

### LPC Planning Priorities

- Establish a knowledge base and an appreciation for equity; create a sense of urgency about moving toward equity; institutionalize equity in decision-making, assessment, and accountability; and build capacity to resolve inequities.
- Increase student success and completion through change in college practices and processes: coordinating needed academic support, removing barriers, and supporting focused professional development across the campus.

### Explain how the equipment supports LPC's Mission Statement and Planning Priorities:

#### Mission Statement

Las Positas College is an inclusive learning-centered institution providing educational opportunities and support for completion of students' transfer, degree, basic skills, career-technical, and retraining goals.

Training LPC students incorporating the Laerdal Q-CPR Manikin within our courses directly supports LPC's Mission Statement in providing an inclusive-learning centered institution that provides educational opportunities that utilize innovative training equipment that support the completion of student transfer degree, basic skills, career technical, and retraining goals, at pace with industry-standards while employing contemporary field tools and equipment related to patient assessment, monitoring, treatment, and reassessment.

#### Planning Priorities

##### Standard I: Mission, Academic Quality, and Institutional Effectiveness, and Integrity

Utilization of the Laerdal Q-CPR Manikin medical training equipment and technology supports LPC Planning Priorities by illustrating the institution ensures that its commitment to high quality education, student achievement and student learning are paramount. Laerdal's proven trainer medical equipment clinical performance record ensures instructor-led training utilizing the Q-CPR Manikin effectuates improved academic quality to students during the development of their psychomotor and critical thinking skills. The Laerdal Q-CPR Manikin is an integral patient assessment tool that incorporates the features of baseline patient assessment and reassessment as determined by EBM prehospital care standards. Laerdal Q-CPR Manikin's innovation and technology, proven CPR guidance—shown to guide responders to perform compressions at 100/minute and avoid over-ventilation, and CPR quality feedback allow students and patient care teams to focus on patients.

##### Standard II: Student Learning Programs and Support Services

Use of the Laerdal Q-CPR Manikin demonstrates the institution offers instructional programs, learning support services, and student support services aligned with its mission. The improved quality and realism of the patient assessment and CPR simulation provided to our students in LPC's EMS programs would be conducted at contemporary levels of quality and rigor appropriate for higher education.

##### Standard III: Resources

Laerdal Q-CPR Manikin's state-of-the-art technology exhibits the college effectively uses its human, physical, technology, and financial resources to achieve its mission and to improve academic quality and institutional effectiveness. Specifically, regarding resources, incorporating the use of the Laerdal Q-CPR Manikin in LPC prehospital theory courses and psychomotor skills training exemplifies the institution plans, acquires or builds, maintains, and upgrades or replaces its physical resources, including facilities, equipment, land, and other assets, in a manner that assures effective utilization and the continuing quality necessary to support its programs and services and achieve its mission. With technology resources, the college embodies the fact that technology services, professional support, facilities, hardware, and software are appropriate and adequate to support the institution's operational functions, academic programs, teaching and learning, and support services. Additionally, the addition of the use of the Laerdal Q-CPR Manikin in Career Technology programs indicates the institution's continuous plans for, updates and replacement of technology to ensure its technological infrastructure, quality and capacity are adequate to support its mission, programs, and services.

##### Standard IV: Leadership and Governance

Through the Instructional Equipment Request (IER) process the institution recognizes and uses the contributions of leadership throughout the organization for promoting student success, sustaining academic quality, integrity, fiscal stability, and continuous improvement of the institution. The governance roles are defined in policy and are designed to facilitate decisions that support student learning programs and services and improve institutional effectiveness. Through established governance structures, processes, and practices, the governing board, administrators, faculty, staff, and students work together for the good of the institution. Institutional leaders create and encourage innovation leading to institutional excellence. They support administrators, faculty, staff, and students, no matter what their official titles, in taking initiative for improving the practices, programs, and services in which they are involved.

SECTION 3: Educational Items | Program Review

**Specify the educational programs the equipment supports:**

The Laerdal Q-CPR Manikin supports multiple educational programs including the Emergency Medical Services and Fire Service Technology Programs:

Emergency Medical Responder (EMR) training and Certificate of Accomplishment, the Emergency Medical Technician (EMT) training and Certificate of Accomplishment, competency and requirements for California state certification and county licensing, and the course preparation to become a Nationally Registered Emergency Medical Technician (NREMT), the Emergency Medical Technician- Paramedic training course completion certificate, Emergency Medical Services EMT-Paramedic Certificate of Accomplishment, Emergency Medical Services EMT-Paramedic Associate of Science degree, California state certification and county licensure, and preparation to become an NREMT Paramedic, and the LPC Fire Service Technology Programs Fire Technology Certificate of Accomplishment, and the Fire Technology Associate of Science degree.

**Is the equipment part of an upcoming Program Review? Was it included last year? If not, why? Use language from your Program Review to explain:**

Since my appointment on August 18, 2022, as LPC Full Time Faculty and as the EMS Training Programs/ Paramedic Academy Director, Emergency Medical Service (EMS) medical equipment, training tools, training platforms, technology, and supplies are identified as an important area requiring assessment, inventory, maintenance, end-of-use, and safety program review. Recently, (from the initial EMS training relocation in June 2021, Building 2100 to the Portable 100 classrooms, and after the second EMS training relocation in May 2022, from the Portable100 classrooms to the current location, the 2500 building) auditing of the LPC EMS medical equipment and supplies continues. The Laerdal Q-CPR Manikin and additional cardiopulmonary medical equipment are necessary to include in the upcoming Program Review.

SECTION 4: Teaching and Learning

**Please use evidence and data that describes how the equipment provides enhancements/benefits to the current level of teaching capabilities:**

The Laerdal Q-CPR Manikin provides multiple enhancements and benefits to the current level of teaching capabilities. Currently, the EMS training program utilizes twelve out of date models of CPR training manikins. Additionally, the existing training manikin technology, features, and capabilities do not meet today's training, patient assessment, and patient care industry standards. Similarly, the outmoded CPR training manikins do not provide AHA's feedback mechanism requirements or possess the additional patient assessment, monitoring, and treatment capabilities necessary for adequately training prehospital care students to optimally perform high quality CPR. Additionally the Laerdal Q-CPR Manikin benefit to teaching include improvements to scenario-based learning. Scenario-based training combines good storytelling with interactive learning. It can be particularly useful when EMS instructional staff need to provide a dialogue and imitate a real-life situation. While it is important to eventually reach the desired goal of the course, walking learners through different scenarios exercises their decision-making and critical thinking skills. Engaging students through a narrative and allowing them to apply their knowledge helps them retain information and psychomotor skill.

**Detail the impact the equipment has on learning:**

The updated Laerdal Q-CPR Manikin enables teachers to provide instruction where students may provide more effective care with an integrated system of equipment, CPR devices, monitor/defibrillators and feedback data solutions that help improve their ability to learn to handle time-dependent emergencies like cardiac arrest and other emergent care needs. The Laerdal Q-CPR Manikin provides reactive and adaptive feedback to save time and help drive improved patient outcomes.

Multiple instructional strategies may be employed using the Laerdal Q-CPR Manikin during training. Educators can navigate different types of scenarios with learners. For psychomotor skills scenario testing, the learner is encouraged to demonstrate skills and knowledge that have been acquired throughout the current lesson or lesson plan. An example is a cardiac arrest patient to provide patient care treatment and deliver high quality CPR to yield the best patient care outcome. The equipment supports instructor use of Problem Solver scenarios; situations where learners have to apply both their theoretical and practical knowledge to solve a problem. These types of scenarios test the learner's decision-making skills, ability to reason and critical reasoning capacity and psychomotor skill.

**Please state the number of classes and students the equipment will impact:**

Classes/Sections: 15	Students: 325
----------------------	---------------

## SECTION 5: Student Learning Outcomes (SLOs)

### Document how the equipment will enable you to surpass your current Student Learning Outcomes:

The Laerdal Q-CPR Manikin state of the art equipment and updated technology will enhance our ability to more realistically provide career technology patient care training to improve student critical thinking skills to surpass our current student learning outcomes throughout all of the EMS Department's courses. The following EMS Program course SLOs include:

#### Emergency Medical Services: Course Student Learning Objectives

##### EMS70 - CPR for Health Care Providers

- Upon completion of EMS 70, the student shall be able to perform the CPR skills required for a Health Care Provider according to the standards of the American Heart Association.

##### EMS11 - Paramedic Theory 2

- Upon completion of EMS 11, the student will be able to perform the correct emergency medical treatment for the condition observed when presented with a clinical condition identified by a 12-lead electrocardiogram.
- Upon completion of EMS 11, the student will be able to read and interpret a 12-lead electrocardiogram in order to describe a syndrome under the umbrella of Acute Coronary Syndromes.

##### EMS13 - Paramedic Laboratory 2

- Upon completion of EMS 13, the student will be able to manage and treat an adult patient in cardiac arrest using the standards of the American Heart Association Advanced Cardiac Life Support protocols.
- Upon completion of EMS 13, the student will be able to properly identify a simulated dynamic and static electrocardiographic rhythm on a 4-lead ECG monitor and treat the syndrome signified by the ECG tracing.
- Upon completion of EMS 13, the student will be able to manage and treat a pediatric patient in cardiac arrest using the standards of the American Heart Association Pediatric Advanced Life Support protocols.

##### EMS12 - Paramedic Laboratory 1

- Upon completion of EMS 12, the student will be able to demonstrate the psychomotor skills related to medication administration, patient assessment, and airway management.
- Upon completion of EMS 12, the student will be able to use a variety of skills from their completed portfolio to assess a patient and carry out appropriate treatment.
- Upon completion of EMS 12, the student will be able to demonstrate the successful insertion of an intravenous catheter into a simulated vein.

##### EMS16 - Paramedic Clinical Occupation

- Upon completion of EMS 16, the student will be able to perform a physical examination on a live patient with their consent and identify immediate life-threatening conditions that need to be treated.
- Upon completion of EMS 16, the student will be able to deliver a patient care report to a physician, registered nurse, or paramedic that is accurate and describes the care delivered by the student.

##### EMS17 - Paramedic Capstone Occupation

- Upon completion of EMS 17, the student will be able to choose the appropriate medication or treatment method medically indicated for the prehospital umbrella of Acute Coronary Syndromes.
- Upon completion of EMS 17, the student will be able to choose the appropriate medication or treatment method medically indicated for the prehospital emergency encountered.
- Upon completion of EMS 17, the student will be able to demonstrate knowledge of all the prehospital treatment protocols used in the service area located where the student is performing the Capstone Internship.
- Upon completion of EMS 17, the student will demonstrate the ability to manage an emergency in the out-of-hospital setting by directing the resources of the local fire department and support personnel from the ambulance provider.

##### EMS10 - Paramedic Theory 1

- Upon completion of EMS 10, the student will be able to assess and discuss respiratory emergencies, and utilize airway tools to treat patients.
- Upon completion of EMS 10, the student will be able to discuss the physiology and pathophysiology of emergent medical illnesses and traumatic injuries.

##### EMS91 - Emergency Med. Tech- Refresher

- Upon completion of EMS 91, the student will be able to articulate the recent advances in emergency medical care within the last two years.
- Upon completion of EMS 91, the student will be able to demonstrate continued proficiency in the psychomotor skills required in their scope of practice.

##### EMS30 - Emergency Medical Responder

- Upon completion of EMS 30, the student will be able to implement treatment at the scope of practice of Emergency Medical Responder.
- Upon completion of EMS 30, the student will be able to recognize emergency medical illnesses and traumatic injuries.

##### EMS20 - Emergency Medical Technician

- Upon completion of EMS 20, the student will be able to demonstrate proficiency in the psychomotor skills required in their scope of practice.
- Upon completion of EMS 20, the student will be able to discuss the physiology and pathophysiology of emergent medical illnesses and traumatic injuries within their scope of practice.

SECTION 6: Total Cost of Ownership | Maintenance and Sustainability

**Please provide the lifespan of the proposed equipment:**

The anticipated lifespan of each Laerdal Q-CPR Manikin is five to seven years; potentially greater with daily and annual maintenance and secure storage.

**What are the requirements and associated costs for the storage of the equipment?**

The Laerdal Q-CPR Manikin requires secure storage while in use with EMS ALS courses and during the use and oversight with its utilization in LPC's EMS BLS programs. Secured storage areas with limited access will be identified in the Public Safety Complex EMS supply and equipment area (Fall 2023 courses). No cost beyond lock and keys are anticipated to store the Laerdal Q-CPR Manikins.

**Is there a specific location required to store the equipment?**

*Note: include storage costs in Part A: Initial Start-Up Costs (pg. 10)*

A specific secured storage area with limited access will be identified upon the EMS Department relocation process at the completion of the Public Safety Complex, anticipated for a Summer 2023 move-in period and commencement of EMS classes in Fall 2023.

**Does the new equipment replace older equipment? If so, will you retire/surplus the old equipment? If not, where will you store the older equipment and what are the associated storage costs?**

The Laerdal Q-CPR Manikin replaces the current out-of-compliance and outdated CPR manikins. These current CPR manikins in use do not possess the capabilities to meet the industry training standard and do not allow the prevailing breadth of instruction necessary in our EMS courses to fulfill the program's regulating agencies' cardiopulmonary resuscitation training standard, patient assessment, psychomotor skill, and treatment requirements. To provide training within the expressed evidence-based medicine (EBM) practice guidelines and skills training curriculum for students to be prepared to enter and pursue careers as prehospital care practitioners, CPR manikin replacement is prudent.

SECTION 6: Total Cost of Ownership | Maintenance and Sustainability (cont'd)

**What are the maintenance costs associated with the regular upkeep of the equipment?**

The Laerdal Q-CPR Manikin is medical training equipment requiring consistent surface after-use cleaning and sterilization to minimize student exposure to bacteria capable of surface transmission. Regular upkeep also requires occasional disposable defibrillation training pad replacement. To achieve the training objectives and maintain student safety, these maintenance costs are minimal and paid through the EMS Department curricular fund.

**Detail how the equipment meets or exceeds LPC's Sustainability Efforts:**

The Laerdal Q-CPR Manikin equipment meets and exceeds LPC's sustainability efforts, as the Laerdal Q-CPR Manikins provide a foundation for renewable resources within the EMS Department programs. This manikin meets industry and training standards and is readily maintained. The Laerdal Q-CPR Manikins create minimal waste and the manikins will be recycled upon the life-exptency end of their use. Additionally, sustainability efforts are maintained throughout their incorporation with instruction in LPC EMS courses; meaning the manikins will be reused by students repeatedly for up to seven years, serving thousands of students. As for basic sustainability, this equipment will not only sustain our CAAHEP Paramedic Academy accreditation requirements to provide high fidelity CPR training, but also keep us from the necessity of seeking out alternative resources for high fidelity and/or live training that may be potentially costly to the college.

**How does the equipment provide renewal resources to the college?**

Obtaining the Laerdal Q-CPR Manikin equipment provides renewal resources to the college, as the Laerdal Q-CPR Manikins provide a foundation for renewable resources within the EMS Department programs. The Laerdal Q-CPR Manikins of meet industry and training standards and are effortlessly maintained. The Laerdal Q-CPR Manikins create limited waste and the manikins will be recycled as "trade-in" upon the life-exptency end of their use. Additionally, sustainability efforts are maintained throughout their incorporation with instruction in LPC EMS courses; meaning the manikins will be reused by students repeatedly for up to seven years, serving thousands of students. As for basic sustainability, these pieces of equipment not only sustain our CAAHEP Paramedic Academy accreditation requirements to provide high fidelity CPR training, but also avoid the necessity to seek out alternative resources for high fidelity CPR training that may be potentially costly to the college.

SECTION 6: Total Cost of Ownership | Maintenance and Sustainability (cont'd)
